**AMENDMENT**

Please amend the above-identified application as follows:

In the Specification:

Please amend the specification in the section of Brief Description of the Drawings as follows by inserting the following:

Figure 4 sets forth examples of multiple shortcut records for a context by including a context field in the shortcut definition record structure.

In the Claims:

Please amend the claims as follows:

1. (Currently Amended) A context aware, shortcut enabled method of presenting information through a user interface on a client device, the method comprising the steps of:

selecting a context;

receiving a shortcut entered through the user interface, the shortcut having a associated with it a shortcut field name set comprising one or more shortcut field names;

inferring from a context definition table, in dependence upon the context, a context table name and a context field name;
